

CRAFT PRODUCTION

Core subjects:

- Ceramic Production 4
- Theory of Ceramic Production 4
- Business Management 4
- Drawing 4

Admission and certification requirements:

- Must have completed Grade 10
- 16 years or older
- Students will be required to complete a one-day practical aptitude test, write a letter of motivation, and construct a miniature sculpture. An individual interview process will be conducted prior to acceptance.

Duration:

2 years full-time

Career options:

- Small, micro and medium ceramic manufacture companies
- Formal or informal sector
- Mass production
- Self-employed

Purpose and rationale:

The purpose of this qualification is to provide the learner with ceramic manufacturing skills to enable him/her to enter into a craft production career. Projects are industry-based and students are given an opportunity to job-shadow and to do in-house training. The culmination of the course is the student's portfolio of work, which provides the learner access into the ceramics manufacture work place.
